

Nitrogen Generator & Inflator Machine (Heavy Duty)

TECHNICAL DATA:

Product Name	Nitrogen Generator & Inflator Machine
Suit For	Car & Light Truck & HEAVY TRUCK
Power Supply	110/220V±10%,50/60Hz
Power Consumption	Through high quality filtration
Nitrogen Generated	PSA Technology
Nitrogen Purity	95~99%
Air Inlet Pressure	15kg/cm ² ;215PSI
Air compressor required	7.5~11KW,15kg/cm ² , Exhaust volume:1~1.5M ³ /min,
Nitrogen Outlet Pressure	13kg/cm ² ;185PSI
N2 Output Capacity	80~120L/Min;21-31Gallon/Min, 2.8~4.24CFM
N2 Tank Capacity	70L/18.5Gallon inside; 130L/34.5Gallon outside
Max. Pressure for N2 Tank	13.5KG/CM ²
Sensor Precision	5PSI
Operating Temperature	0-50°C,0-122°F
Standard Accessories	Two 10m length pu hoses+Vaccum Generator & N2 Inflator device
Optional	220L/58Gallon N2 Tank External

FEATURES :

- Heavy duty suit for heavy truck
- Fast Nitrogen generation & inflation speed
- Automatic shut-off after nitrogen generation
- 200 Litre Nitrogen Tank enable enough storage of N2 for rush hours
- Equipped with high pressure & precision oil/water vapour filter & separator
- Inside pipes made by metal, suitable for heavy pressure purposes
- Quick coupler to connect the "Vaccum Generator & N2 Inflator device " with the machine by two 10meters length hoses
