

TWO POST LIFT GANTRY

SPECIFICATIONS :

Capacity(kg)	4000
Lift height(mm)	1800
Rise time(s)	50
Drop time(s)	20
Power of motor (kw)	2.2
Power supply(v)	380/220
Machine Height(mm)	3601
Machine Width(mm)	3254
Frame Width(mm)	3427

FEATURES :

- 5mm "international standard" column steel plates
- 8mm brace arm and 6mm Internal sliding column
- Wearable, Anti-High temperature, high strength oiliness macromolecule nylon slide block
- Require no less than 150mm cement on the ground, At least C25
- Double safe Antiskid device, from Column ladder safe to close protection by dynamic hydraulic pressure, Ensure double safe stay for vehicle
- Endure Max 5 T destructive testing , fulfill 4T actual working condition
- Chain style pulling device , make the security parameter up to 5 times
- Total Mold tooling technology, to ensure the conformity of both many a holes and welding places
- Digital control raw materials processing center ensure the discrepancies at % stage & product consistency
- Double cylinder dynamic hoist drive device, capacity is more than 4T
- Aluminum pump device , running time without any break down for at least 40,000 H
- Mechanical control hydraulic pressure configuration. Simple, endurable and reliable
