

Wheel Balancer (Heavy Duty)

TECHNICAL FEATURES:

Power Supply	380V/60 Hz/3 Ph
Power	0.75Kw
Working Air Pressure	0.3 – 0.6 MPa
Rim Width	3/20"
Rim diameter	12/24"
Max wheel diameter	40 – 150mm
Max wheel diameters	1200mm
Balancing time	Small Vehicle 7 Second & Larger Vehicle 10 Second
Balancing Speed	210 rpm
Balancing precision	Small Vehicle ± 1 gm and Larger Vehicle ± 25 gm
Net/Gross Weight :	300/370 Kg.
Packing dimension	1700 x 880 x 1250

FEATURES :

- It can use for heavy duty tyres i.e. Mini Bus & Trucks
- It can balance different size of wheels through pressing button MODE to Select
- Pneumatic lift makes the truck wheel balancing easily
- Automatic pneumatic brake, less noise
- The reinforced shaft structure ensures the stable measurement.
- Different wheels, different residual error, and automatically set up
